Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

40. Smith K (2022). Data on Eastern Regent Parrot breeding observations in South Australia. Private individuals. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

41. NT Government (2022). NT Government Top End Ecological Monitoring Program. Compiled by Brydie Hill. Northern Territory Government. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

42. NT Government (2022). NT Government Top End Ecological Monitoring Program (Brush-tailed Rabbit-rat). Compiled by Brydie Hill. Northern Territory Government. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

43. SA Government (2022). Australian Sea-lion Monitoring Department for the Environment and Water (DEW) & South Australian Research and Development Institute (SARDI). Compiled by Simon Goldsworthy. The State of South Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

44. SA Government (2022). Subantarctic Fur Seal Monitoring (South Australian Research and Development Institute (SARDI)). Compiled by Simon Goldsworthy. The State of South Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

45. WA Government (2022). Australian Sea-lion Monitoring – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Simon Goldsworthy. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

46. AWC (2022). AWC Scotia Wildlife Sanctuary Bridled Nailtail Wallaby Monitoring. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

47. AWC (2022). AWC Scotia Wildlife Sanctuary Bilby Monitoring. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

48. AWC (2022). AWC Scotia Wildlife Sanctuary Numbat Monitoring. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

49. AWC (2022). AWC Yookamurra Wildlife Sanctuary Bettong Monitoring. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

50. AWC (2022). AWC Yookamurra Wildlife Sanctuary Bilby Monitoring. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

51. AWC (2022). AWC Yookamurra Wildlife Sanctuary Numbat Monitoring. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

52. AWC (2022). AWC Brooklyn Wildlife Sanctuary Spatial Mark-Resight Trapping (Northern Quoll). Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

53. AWC (2022). AWC Brooklyn Wildlife Sanctuary Camera Trapping (Northern Quoll). Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian

Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

54. AWC (2022). AWC Piccaninny Plains Wildlife Sanctuary Spatial Mark-Resight Trapping (Carpentarian Antechinus). Compiled by Fay Lewis.. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

55. AWC (2022). AWC Piccaninny Plains Wildlife Sanctuary Camera Trapping (Black-footed Tree-rat). Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

56. AWC (2022). AWC Newhaven Wildlife Sanctuary Black-footed Rock-wallaby Activity Surveys. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

57. AWC (2022). AWC Karakamia Wildlife Sanctuary Woylie Population Survey. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

58. AWC (2022). AWC Paruna Wildlife Sanctuary Black-flanked Rock-wallaby Trapping. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

59. AWC (2022). AWC Buckaringa Wildlife Sanctuary Yellow-footed Rock-wallaby Monitoring. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

60. AWC (2022). AWC Kalamurina Wildlife Sanctuary Spatial Mark-Resight Trapping (Crest-tailed Mulgara). Compiled by Fay Lewis. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

61. AWC (2022). AWC Kalamurina Wildlife Sanctuary Crest-tailed Mulgara Mulgara Tracking. Compiled by Fay Lewis. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

62. Hayes C (2022). Conservation ecology of Sharman's rock-wallaby PhD project. Compiled by Catherine Hayes. Australian Wildlife Conservancy, The University of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

63. WA Government (2022). Upper Warren Region fauna monitoring – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Marika Maxwell. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

64. WA Government (2022). Bilby Monitoring – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Martin Dziminski. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

65. WA Government (2022). Dibbler Recovery Program Monitoring – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Tony Friend. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

66. WA Government (2022). Dirk Hartog Island Return to 1616 Source population monitoring – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Colleen Sims. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

67. WA Government (2022). Gorgon Offset – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Colleen Sims. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

68. WA Government (2022). Kingston Project (Western Ringtail Possum) – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Marika Maxwell. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

69. WA Government (2022). Montebello Renewal – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Colleen Sims. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

70. WA Government (2022). Numbat Recovery Program Monitoring – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Tony Friend. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

71. WA Government (2022). Shark Bay World Heritage Threatened Species (Biodiversity Conservation Initiative – Caring for Country) and Dirk Hartig Island Return to 1616 Source population monitoring – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Colleen Sims. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

72. WA Government (2022). Western Shield Monitoring – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Michelle Drew. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

Lazenby BT, Tobler MW, Brown WE, Hawkins CE, Hocking GJ, Hume F, Huxtable S, Iles P, Jones ME, Lawrence C, Thalmann S, Wise P, Williams H, Fox S, Pemberton D (2018) Data from: Density trends and demographic signals uncover the long-term impact of transmissible cancer in Tasmanian Devils. Dryad Digital Repository. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

74. Heinze D (2022). Long-term Mountain Pygmy-possum monitoring. Private individuals. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

75. Zoos Victoria (2022). Lowland Leadbeater's Possum Population Monitoring. Compiled by Dan Harley. Zoos Victoria. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

76. Arid Recovery (2022). Arid Recovery Monitoring. Compiled by Georgina Neave. Arid Recovery. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

77. Goldingay R (2022). Yellow-bellied glider monitoring Richmond Range National Park. Southern Cross University. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

78. Noad MJ, Kniest E, Dunlop RA, Paterson RA, Paterson P, Cato DH (2022). Point Lookout Humpback Whale Survey. Noad MJ, Kniest E, Dunlop RA (2019). Boom to bust? Implications for the continued rapid growth of the eastern Australian humpback whale population despite recovery. Population Ecology 1-12. doi:10.1002/1438-390X.1014 AND Paterson RA, Paterson P, Cato DH (2001) Status of humpback whales, Megaptera novaeangliae, in east Australia at the end of the 20th century. Memoirs of the Queensland Museum 47(2): 579-586. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

79. WA Government (2022). Landscape Conservation Initiative – Department of Biodiversity, Conservation and Attractions, WA. Compiled by Ian Radford. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

80. Qld Government (2022). Wombat – Internal Department of Environment and Science Report. Compiled by Alan Horsup. The State of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

81. FCNSW (2022). Forestry Corporation of NSW Yellow-bellied Glider Monitoring Bago Plateau. Data compiled by Rohan Bilney. The State of New South Wales. Aggregated for the Australian

Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

82. Winter J (2022). Yellow-bellied Glider (Wet Tropics) Project – Queensland Parks and Wildlife Service. Compiled by John Winter. The State of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

83. FCNSW (2022). Forestry Corporation of NSW Long-nosed Potoroo Monitoring. Data compiled by Rohan Bilney. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

84. Director of National Parks (2022). Christmas Island Flying-fox island-wide survey. Director of National Parks. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

85. Davies H (2022). Tiwi Mammal Monitoring. Private individuals. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

86. Tas Government (2022). Annual population estimates of Southern Elephant Seals at Macquarie Island from censuses made annually on October 15th – Department of Primary Industries, Parks, Water and Environment. Extracted from Australian Antarctic Data Centre – CAASM Metadata. Australian Antarctic Data Centre Elephant Seal Census. The State of Tasmania. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

87. Hernandez-Santin L, Fisher D (2022). Northern quoll monitoring – UQ. Compiled by Diana Fisher. The University of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

88. Fisher D (2022). Bridled nailtail wallaby – UQ field course monitoring BIOL3016. Compiled by Diana Fisher. The University of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

89. Fisher D (2022). Yellow-footed Rock-wallaby – UQ field course monitoring BIOL3016. Compiled by Diana Fisher. The University of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

90. Kaluza J (2022). Water mouse monitoring. Private individuals. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

91. Qld Government (2022). Diamantina Pest Arrest Project (Kowari) – Department of Environment and Science (DES). Compiled by John Augusteyn. The State of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

92. Qld Government (2022). Bilby monitoring program – Department of Environment and Science (DES). Compiled by John Augusteyn; source: Peter McRae. The State of Queensland. Aggregated

for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

93. Qld Government (2022). Idalia Pest Arrest project (Bridled Nailtail Wallaby) – Department of Environment and Science (DES). Compiled by John Augusteyn. The State of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

94. Vic Government (2022). Helmeted Honeyeater (Yellingbo). The State of Victoria. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

95. Salgado Kent C, Recalde-Salas A (2022). Humpback Whale Monitoring. Compiled by Angela Recalde Salas. Salgado Kent; Recalde-Salas. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

96. Milledge D (2022). Ngunya Jargoon Indigenous Protected Area Northern Long-nosed Potoroo Population Monitoring. Compiled by David Milledge. Private individuals. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

97. Baker A, Batista S (2022). Antechinus argentus monitoring survey. Compiled by Stephane Batista. Queensland University of Technology. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

98. Baker A, Batista S (2022). Antechinus arktos monitoring survey. Compiled by Stephane Batista. Queensland University of Technology. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

99. SA Government (2022). Biological Databases of South Australia (BDBSA) data extract. The State of South Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

100. Qld Government (2022). Water mouse monitoring – Department of Environment and Science (DES). Compiled by Tina Ball. The State of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

101. SA Government (2022). Kowari monitoring – South Australian Arid Lands Natural Resources Management Board. Compiled by Rob Brandle and Catherine Lynch.. The State of South Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

102. Qld Government (2022). Threatened Species Operations Monitoring – Department of Environment and Science (DES). Compiled by Ian Gynther, data sourced from WildNet. The State of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP

Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

103. Qld Government (2022). Threatened Species Operations Monitoring (Large-eared Pied Bat) – Department of Environment and Science (DES). Compiled by Ian Gynther, data sourced from WildNet. The State of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

130. ACT Government (2022). Tarengo Leek orchid monitoring. Australian Capital Territory. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

131. NSW Government (2022). Saving our Species monitoring – Curly-bark Wattle (Acacia curranii) annual monitoring. Compiled by Darren Shelly. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

132. NSW Government (2022). Saving our Species monitoring – Eriocaulon carsonii monitoring on artesian springs at Peery Lake. Compiled by Darren Shelly. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

133. NSW Government (2022). Saving our Species monitoring – Grevillea kennedyana monitoring within exclosures in Sturt National Park. Compiled by Darren Shelly. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

134. NSW Government (2022). Saving our Species monitoring – Xerothamnella parvifolia census monitoring on Mt. Poole. Compiled by Darren Shelly. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

135. NSW Government (2022). Saving our Species monitoring – Zieria obcordata population trend monitoring. Compiled by Darren Shelly. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

136. NSW Government (2022). Saving our Species monitoring – Banksia vincentia. Data compiled by David Bain. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

137. NSW Government (2022). Saving our Species monitoring – Genoplesium baueri. Data compiled by David Bain and James Dawson. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

138. Grimm W (2022). Genoplesium baueri monitoring Ku-ring-gai Chase NP & Ku-ring-gai Wildflower Garden populations. Private individuals. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

139. NSW Government (2022). Saving Our Species monitoring – Pterostylis vernalis. Data compiled by David Bain. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

140. NSW Government (2022). Saving our Species monitoring – Grevillea obtusiflorat. Data compiled by David Coote. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

141. NSW Government (2022). Saving Our Species monitoring – Pultenaea sp. Genowlan Point. Compiled by David Coote. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

142. WA Government (2022). DBCA threatened plants monitoring – Midwest, South Coast and Warren. Compiled by Colin Yates. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

143. NSW Government (2022). Saving Our Species monitoring – Astrotricha roddii, Isoglossa eranthemoides. Compiled by Jill Smith. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

144. NSW Government (2022). Saving Our Species monitoring – Grevillea wilkinsonii, Prasophyllum affine, Zieria Adenophora, Zieria buxijugum, Zieria formosa. Compiled by John Briggs. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

145. NSW Government (2022). Saving Our Species monitoring – Diuris ochroma, Pomaderris delicata. Compiled by Keith McDougall. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

146. NSW Government (2022). Saving Our Species monitoring – Pomaderris cotoneaster, Prasophyllum petilum and Pomaderris pallida. Compiled by Rob Armstrong. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

147. NSW Government (2022). Saving our Species monitoring – Wollemia nobilis. Compiled by Tony Auld and Berin Mackenzie. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

148. Robin Leppitt (2022). Alligator Rivers Yellow Chat monitoring. Charles Darwin University. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

149. SA Government (2022). Project 832: IMPACT OF FIRE ON ORCHID POLLINATION-MLR Caladenia behrii, Caladenia rigida. The State of South Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

150. SA Government (2022). Northern Lofty Block Threatened Orchid Recovery Team – Caladenia argocalla, C. gladiolata, C. intuta, C. macroclavia, C. woolcockiorum, Pterostylis despectans, P. lepida. The State of South Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

151. NSW Government (2022). Saving our Species monitoring – Malleefowl. Compiled by the Department of Planning Industry and Environment. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

152. NSW Government (2022). Saving Our Species monitoring – Gould's Petrel. Compiled by Nicholas Carlile. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

153. NSW Government (2022). Saving Our Species monitoring – Lord Howe Pied Currawong. Compiled by Nicholas Carlile. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

154. NSW Government (2022). Saving Our Species monitoring – Kermadec Petrel. Compiled by Nicholas Carlile. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

155. SA Government (2022). SA Murray Darling Basin Threatened Flora Recovery Team dataset. The State of South Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

156. SA Government (2022). Project 377: THREATENED ORCHID MONITORING (SE) Prasophyllum frenchii. The State of South Australia. Aggregated for the Australian Threatened Species Index,

an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

157. Dickson C (2022). Nationally threatened flora status assessment in the South East of South Australia. Dickson C.R. (2016) Nationally threatened flora status assessment in the South East of South Australia. Report to Department of Environment, Water and Natural Resources, Government of South Australia. NGT Consulting – Nature Glenelg Trust, Mount Gambier, South Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

Northern Plains Grassland Fauna Surveys at Terrick Terrick National Park. July 2019-June 2020 Progress Report. Report to Parks Victoria, Melbourne. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

182. NSW Government (2022). Saving our Species monitoring – Southern Brown Bandicoot. Compiled by Andrew Claridge. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

183. NSW Government (2022). Saving our Species monitoring – Yellow-footed Rock-wallaby. This dataset has had significant involvement from the Mutawintji Local Aboriginal Land Council and Mutawintji Board of Management who are the traditional owners of the site where the rock-wallaby occurs. Compiled by Sarah Bell. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

184. NSW Government (2022). Saving our Species monitoring – Long-nosed Potoroo. Compiled by Andrew Claridge. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

185. NSW Government (2022). Saving our Species monitoring – Diuris aequalis. Compiled by Laura Canackle. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

186. Adam Mckeown, Chris Pavey, Eric Vanderbuys, Stewart Mcdonald (2022). Summary of the National Flying-Fox Monitoring Program results – Spectacled Flying Fox. CSIRO Land and Water. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

187. Vic Government (2022). Victorian Biodiversity Atlas data extract – plants. The State of Victoria. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

188. NSW Government (2022). Saving Our Species monitoring – Koala Monitoring in SENSW Coastal Forests: 2007-19. Compiled by Rod Pietch. The State of New South Wales. Aggregated for the

Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

189. QWSG (2022). Queensland Wader Studies Group shorebird monitoring updated. Queensland Wader Studies Group. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

190. WA Government (2022). DBCA threatened plants monitoring – Wheatbelt. Compiled by Colin Yates. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

191. Driessen M (2022). Threatened mammal monitoring. Driessen, M. M., Jarman, P. J., Visoiu, M., and Dewar, E. (2021). Mammal responses to moderate-intensity planned burning in a small, isolated woodland reserve. Wildlife Research 48, 561–576. doi: 10.1071/WR20165. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

192. Vic Government (2022). Victorian Biodiversity Atlas data extract 2020 – mammals. Compiled by Mel Hardie. The State of Victoria. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

193. NSW Government (2022). Saving Our Species monitoring – Caladenia tessellata. Compiled by Kylie Coutts-McClelland. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

194. AWC (2022). AWC Charnley River-Artesian Range Wildlife Sanctuary Monjon surveys. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

195. AWC (2022). AWC Faure Boodie (Shark Bay) Trapping Survey. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

196. AWC (2022). AWC Mornington Wildlife Sanctuary Northern Quoll Monitoring. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

197. AWC (2022). AWC Mt Gibson Wildlife Sanctuary Western Barred Bandicoot. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

198. AWC (2022). AWC Charnley River-Artesian Range Wildlife Sanctuary Northern Quoll Monitoring. Compiled by Fay Lewis and Liana Joseph. Australian Wildlife Conservancy. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

199. SA Government (2022). Biological Databases of South Australia (BDBSA) data extract 2020 – birds. The State of South Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

200. NSW Government (2022). Saving Our Species monitoring – Mainland Ground Parrot (NSW). Compiled by David Bain. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

201. NSW Department of Planning, Industry and Environment (2022). Saving Our Species monitoring – Mainland Ground Parrot (NSW). Compiled by Damon Oliver. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

202. Tulloch A (2022). Post-fire distribution abundance and habitat use of small mammals in Royal National Park. Private individuals. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

203. NSW Government (2022). Saving Our Species monitoring – Pale Yellow Double-tail (Diuris flavescens) monitoring. Compiled by Paul Hillier. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

204. NSW Government (2022). Saving Our Species monitoring – Somersby Mintbush (Prosthanthera junonis) Flora Survey and Monitoring. Compiled by Paul Hillier. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

205. NSW Government (2022). Saving Our Species monitoring – Baeckea kandos monitoring. Compiled by David Coote. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

206. NSW Government (2022). Saving Our Species monitoring – Persoonia marginata monitoring. Compiled by David Coote. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

207. NSW Government (2022). Saving Our Species monitoring – Acacia gordonii monitoring. Compiled by Ahamad Sherieff. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

208. NSW Government (2022). Saving Our Species monitoring – Bossiaea fragrans monitoring. Compiled by Jessica Peterie. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

209. NSW Government (2022). Saving Our Species monitoring – Acacia meiantha monitoring. Compiled by Jessica Peterie. The State of New South Wales. Aggregated for the Australian

Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

210. NSW Government (2022). Saving Our Species monitoring – Persoonia hindii monitoring. Compiled by Jessica Peterie. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

211. NSW Government (2022). Saving Our Species monitoring – Neoastelia spectabilis monitoring. Compiled by Paul Sheringham. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

212. Wilson B (2022). Pseudomys novaehollandiae monitoring. Wilson Barbara A., Lock Mandy, Garkaklis Mark J. (2017) Long-term fluctuations in distribution and populations of a threatened rodent (Pseudomys novaehollandiae) in coastal woodlands of the Otway Ranges, Victoria: a regional decline or extinction?. Australian Mammalogy 40, 281-293. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

213. Houston W (2022). Capricorn Yellow Chat annual trend data 2004-2016. Central Queensland University. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

214. Cremasco P (2022). Spotted-tailed Quoll moniotring in Cullendore, border of QLD and NSW. Private individuals. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

215. BLA (2022). Northern Rufous Scrub-bird BLA. BirdLife Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

216. NSW Government (2022). Saving our Species monitoring – Micromyrtus blakelyi annual population monitoring. Compiled by Vera O`Donovan. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

217. Vic Government (2022). Southern Right Whale SE AUS population long-term monitoring. The State of Victoria. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

218. WA Government (2022). Pilbara northern quoll research program. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

219. Webb J (2022). Kakadu Northern Quoll Monitoring. University of Technology Sydney. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

220. Collingwood T (2022). Rhodamnia rubescens data. Compiled by Teghan Collingwood.. The University of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

221. NSW Government (2022). Saving Our Species monitoring – Zieria tuberculata monitoring. Compiled by David McCreery. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

222. WA Government (2022). Pingaring Spider Orchid long term monitoring WA DBCA. The State of Western Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

223. Rowland J (2022). Spotted-tailed quoll monitoring. Rowland, J., Hoskin, C. J. and Burnett, S. (2022). Camera-trapping density estimates suggest critically low population sizes for the Wet Tropics subspecies of the spotted-tailed quoll (Dasyurus maculatus gracilis). Austral Ecology. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

224. Lazenby BT, Bell P, Driessen MM, Pemberton D, Dickman CR (2022). Tassie Devil monitoring via live trapping. The State of Tasmania. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

225. Qld Government (2022). Taunton spotlighting and thermal imaging BNT monitoring. The State of Queensland. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

226. NSW Government (2022). Saving our Species monitoring – Rosewood Mistletoe, Coastal Fontainea and Willi Willi Zieria SoS species monitoring. Compiled by Dianne Brown. The State of New South Wales. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

227. ACT Government (2022). Offset monitoring data on Ginninderra Peppercress, Lepidium ginninderrense and Button wrinklewort . Australian Capital Territory. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

228. Vic Government (2022). Victorian Biodiversity Atlas data extract – Macquarie Island Wandering Albatross data extracted from multiple sources: 1: de la Mare, W.K., and Kerry, K.R. 1994. Population dynamics of the wandering albatross Diomedea exulans on Macquarie Island and the effects of mortality from longline fishing. Polar Biology 14: 231-241. 2: Carrick, R., and Ingham, S.E. 1970. Ecology and population dynamics of Antarctic sea birds. Pp. 20-45 in Antarctic Ecology Vol. I. Holdgate M.W. (ed.). Academic Press, London. 3: Tomkins, R.J. 1985. Reproduction and mortality of Wandering albatrosses on Macquarie Island. Emu 85: 40-42. 4: Garnett, S.T. 1992. The Action Plan for Australian Birds. Australian National Parks and Wildlife Service, Canberra. 5: G. Copson pers. comm. on DEH web page http://www.deh.gov.au/biodiversity/threatened/publications/recovery/albatross/breeding.html. 6: Gales, R., Brothers, N., Terauds, A., and Copson, G. in press. Population status, productivity

and at-sea records of albatrosses and giant-petrels breeding on Macquarie Island. Marine Ornithology: in press. The State of Victoria. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

229. Vic Government (2022). Melbourne Strategic Assessment monitoring. The State of Victoria. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.

230. BLA, QWSG (2022). Limosa lapponica baueri and Limosa lapponica menzbieri shorebird data from Bar-tailed Godwit data BirdLife Australia and Queensland Wader Studies Group. The geographical cutoff for splitting up the Bar-tailed Godwit species level data was based on the location of Adelaide (longitude 138.6): baueri subspecies considered to occur to the east, menzbieri subspecies to the west. BirdLife Australia. Aggregated for the Australian Threatened Species Index, an output of the NESP Threatened Species Recovery Hub and operated by the Terrestrial Ecosystem Research Network, The University of Queensland.
