The endangered Superb Groundsel (Senecio megaglossus) in and adjacent to The Dutchmans Stern Conservation Park in South Australia. Consultants report to Yorke and Mid-North Region, Department

for Environment and Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

13. Davies R-JP (2020). Monitoring of vulnerable daisy Senecio macrocarpus in Messent Conservation Park, South Australia. Davies R-JP (2009, 2005a, 2005b). The monitoring of the impact of fire and hydrological change on the nationally threatened daisy Senecio macrocarpus in Messent Conservation Park in the Upper South East of South Australia, 1992-2009. Consultants report prepared for South East Region, Department for Environment & Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

14. Davies R-JP (2020). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia – Acacia menzelii. Davies, R (2000). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia. Report prepared for the Department for Environment and Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

15. Davies R-JP (2020). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia – Balcanoona Wattle. Davies, R (2000). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia. Report prepared for the Department for Environment and Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

16. Davies R-JP (2020). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia – Birds Nest Wattle. Davies, R (2000). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia. Report prepared for the Department for Environment and Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

17. Davies R-JP (2020). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia – Caladenia gladiolata. Davies, R (2000). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia. Report prepared for the Department for Environment and Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

18. Davies R-JP (2020). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia – Codonocarpus pyramidalis. Davies, R (2000). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia. Report prepared for the Department for Environment and Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

19. Davies R-JP (2020). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia – Pleuropappus phyllocalymmeus. Davies, R (2000). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia. Report prepared for the Department for Environment and Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

20. Davies R-JP (2020). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia – Prasophyllum pallidum. Davies, R (2000). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia. Report prepared

for the Department for Environment and Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

21. Davies R-JP (2020). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia – Pterostylis arenicola. Davies, R (2000). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia. Report prepared for the Department for Environment and Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

22. Davies R-JP (2020). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia – Pterostylis cucullata. Davies, R (2000). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia. Report prepared for the Department for Environment and Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

23. Davies R-JP (2020). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia – Resin Wattle. Davies, R (2000). Population Trends for Threatened Plant Species in Parks and Pastoral Leases in South Australia. Report prepared for the Department for Environment and Heritage. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

24. Dickson C (2020). Nationally threatened flora status assessment in the South East of South Australia. Dickson C.R. (2016) Nationally threatened flora status assessment in the South East of South Australia. Report to Department of Environment, Water and Natural Resources, Government of South Australia. NGT Consulting – Nature Glenelg Trust, Mount Gambier, South Australia. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

Recovery action implementation for threatened arid acacias: distribution, monitoring and Indigenous ecological knowledge of A. peuce, A. undoolyana, A. pickardii and A. latzii. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

31. NSW Government (2020). Curly-bark Wattle (Acacia curranii) annual monitoring for NSW DPIE Saving Our Species project. Compiled by Darren Shelly. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

32. NSW Government (2020). Eriocaulon carsonii monitoring on artesian springs at Peery Lake for NSW DPIE Saving Our Species project. Compiled by Darren Shelly. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

33. NSW Government (2020). Grevillea kennedyana monitoring within exclosures in Sturt National Park for NSW DPIE Saving Our Species project. Compiled by Darren Shelly. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

34. NSW Government (2020). Saving Our Species monitoring – Pomaderris cotoneaster, Prasophyllum petilum. Compiled by Rob Armstrong. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

35. NSW Government (2020). Saving Our Species Monitoring – Astrotricha roddii, Isoglossa eranthemoides. Compiled by Jill Smith. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

36. NSW Government (2020). Saving our Species monitoring – Banksia vincentia. Data compiled by David Bain. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

37. NSW Government (2020). Saving Our Species monitoring – Caladenia tessellata. Compiled by Kylie Coutts-McClelland. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

38. NSW Government (2020). Saving Our Species monitoring – Calochilus pulchellus. Compiled by Kylie Coutts-McClelland. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

39. NSW Government (2020). Saving our Species monitoring – Diuris aequalis. Compiled by Laura Canackle. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

40. NSW Government (2020). Saving Our Species monitoring – Diuris ochroma, Pomaderris delicata. Compiled by Keith McDougall. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

41. NSW Government (2020). Saving Our Species monitoring – Diuris ochroma, Pomaderris delicata. Keith McDougall. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

42. NSW Government (2020). Saving Our Species monitoring – Eucalyptus recurva, Grevillea wilkinsonii, Prasophyllum affine, Zieria Adenophora, Zieria buxijugum, Zieria formosa. Compiled by John Briggs. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

43. NSW Government (2020). Saving our Species monitoring – Genoplesium baueri. Data compiled by David Bain. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

44. NSW Government (2020). Saving our Species monitoring – Grevillea obtusiflora. Data compiled by David Coote. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

45. NSW Government (2020). Saving Our Species monitoring – Pterostylis vernalis. Data compiled by David Bain. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

46. NSW Government (2020). Saving our Species monitoring – Wollemia nobilis. Compiled by Tony Auld and Berin Mackenzie. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

47. NSW Government (2020). Xerothamnella parvifolia census monitoring on Mt. Poole for NSW DPIE Saving Our Species project. Compiled by Darren Shelly. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

48. NSW Government (2020). Zieria obcordata population trend monitoring for NSW DPIE Saving Our Species project. Compiled by Darren Shelly. The State of New South Wales. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

49. Reiter NH (2020). N. Reiter, unpublished data on Sphaerolobium acanthos. National Action Plan for Australia's Imperilled Plants (draft). Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

50. Reiter NH, Walsh NG, Lawrie AC (2020). Causes of infertility in the endangered Australian endemic plant Borya mirabilis. Reiter et al. (2015). Causes of infertility in the endangered

Australian endemic plant Borya mirabilis (Boryaceae). Australian Journal of Botany 63, 554-565. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

51. Rule K, Molyneux WM (2020). Two new mallee Eucalypts (Myrtaceae) from Gippsland, Victoria. Rule, K. & Molyneux, W.M. (2011). Two new mallee Eucalypts (Myrtaceae) from Gippsland, Victoria. Muelleria 29, 16-26. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

52. SA Government (2020). Acanthocladium dockeri natural sites counting in South Australia. Compiled by Doug Bickerton. The State of South Australia. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

53. SA Government (2020). Northern Lofty Block Threatened Orchid Recovery Team – Caladenia argocalla, C. gladiolata, C. intuta, C. macroclavia, C. woolcockiorum, Pterostylis despectans, P. lepida. The State of South Australia. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

54. SA Government (2020). Project 377: THREATENED ORCHID MONITORING (SE) Prasophyllum frenchii. The State of South Australia. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

55. SA Government (2020). Project 832: IMPACT OF FIRE ON ORCHID POLLINATION-MLR Caladenia behrii, Caladenia rigida. The State of South Australia. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

56. SA Government (2020). SA Murray Darling Basin Threatened Flora Recovery Team dataset. The State of South Australia. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

57. Silock J (2020). J. Silcock unpublished data on Gunniopsis sp. The University of Queensland. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

58. Taylor T (2020). T. Taylor, unpublished data on Gossia gonoclada. National Action Plan for Australia's Imperilled Plants (draft). Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

59. Vic Government (2020). Victorian Biodiversity Atlas data extract – plants. The State of Victoria. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16

60. WA Government (2020). DBCA threatened plants monitoring – Midwest, South Coast, Warren and Wheatbelt. Compiled by Colin Yates. The State of Western Australia. Aggregated for National Environmental Science Program Threatened Species Recovery Hub Project 3.1. Generated on 2020-11-16
